

VLAM's laminated 3-layer weather-foil wrap is like no other of its kind and designed for use in the most extreme climate zones. This ensures the greatest reduction in heat absorption when exposed to high UV sunlight. Our patented **VLAM** cool color technology prevents the sun's radiation from penetrating into the vinyl as it is reflected off the surface of our windows and patio doors.

PERFECT FOR **ANY** PROJECT

VLAM's Jet Black is the darkest black on the market and provides a classic and elegant look to our windows and patio doors. Our mattex surface significantly enhances the appearance of our windows and it is scratch-resistant, chemical-resistant and easy to clean.

VLAM's lamination process begins after we apply our high bonding adhesive to our frames. We begin with our first layer which is white that reflects infrared heat off the frames. Our second coat increases the heat-blocking abilities and our durable top coating finishes the lamination process, providing our eye-catching black hue.

MODERN FARMHOUSE COLLECTION

Classic farmhouse home designs have stood the test of time and have evolved into today's more modern farmhouse style. Our modern farmhouse collection offers the perfect blend of a traditional country look with a more contemporary design. With clean lines and the darkest black on the market, our Modern Farmhouse Collection is the perfect choice for your home.

Our Modern Farmhouse Collection comes in double-hung windows, 2 and 3 lite slider windows, picture (fixed) windows, casement windows, shapes and patio doors.
